**Niniejszy dokument zawiera ważne informacje dotyczące dalszego
bezpiecznego i właściwego użytkowania sprzętu.**

Należy przekazać poniższe informacje wszystkim członkom personelu, którzy powinni się z nimi zapoznać. Istotne jest zrozumienie implikacji wynikających z niniejszego powiadomienia. Prosimy o dołączenie egzemplarza niniejszego dokumentu do instrukcji obsługi urządzenia.

Firma Philips Healthcare ustaliła, że istnieje ryzyko zablokowania się monitorów pacjenta SureSigns VS2+ oraz zatrzymania procesu monitorowania w trakcie stosowania u pacjenta. Jeśli monitor VS2+ działa w trybie okresowego nieinwazyjnego pomiaru ciśnienia krwi, u pacjenta mierzone są parametry SpO2 oraz ciśnienie krwi metodą nieinwazyjną i nastąpi zablokowanie się monitora, spowoduje to wstrzymanie obu tych pomiarów oraz funkcji alarmowania. W takim przypadku, jeśli lekarz nie będzie świadomy zatrzymania pomiaru tych parametrów w monitorze pacjenta VS2+, działania interwencyjne mogą zostać podjęte z opóźnieniem.

Firma Philips Healthcare rozpoczęła działania korekcyjne mające na celu usunięcie tej nieprawidłowości w opisywanych urządzeniach. Należy zapoznać się z informacjami dotyczącymi zalecanego sposobu postępowania znajdującymi się na następnych stronach tego dokumentu. Należy postępować zgodnie z zaleceniami zamieszczonymi w części „DZIAŁANIA, JAKIE POWINIEN PODJĄĆ KLIENT/UŻYTKOWNIK”. Problem został zgłoszony właściwym instytucjom nadzorującym.

Przepraszamy za wszelkie niedogodności, które mogą z tego wynikać. Firma Philips Healthcare jest zasłużenie postrzegana w branży jako dostawca produktów i usług najwyższej jakości. Państwa zadowolenie z produktów firmy Philips Healthcare oraz z naszego zaangażowania w usunięcie opisanego problemu jest dla nas bardzo ważne.
